---

SUMMARY

Software Engineer with 3+ years of experience building and maintaining production web applications using React.js, Next.js, TypeScript, and JavaScript. Experienced in application architecture, reusable components, API integration, server-side rendering (SSR), performance optimization, and CI/CD workflows. Hands-on experience with Node.js, AWS, Docker, and AI-assisted development. Strong collaborator with product, design, and backend teams, focused on writing maintainable code and delivering reliable software. Feel free to explore my work: harshal-singh.vercel.app

---

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, Vue.js
Backend: Node.js, Express.js, REST APIs, GraphQL, Hasura, PHP
Databases: MySQL, MongoDB
Cloud & DevOps: AWS, Docker, Azure DevOps, CI/CD, Bash Scripting
Tools: Git, GitHub, Jira, Figma, Sketch, Postman, Cursor, Claude Code

---

EXPERIENCE

Webol Solutions *Remote, UK*
Frontend Developer *Jul 2025 – Present*

- Engineer production web applications with Next.js, React.js, and TypeScript, building reusable components and responsive interfaces for product features.
- Integrate REST APIs and collaborate with backend engineers on API contracts, debugging, data flows, and production issue resolution.
- Translate product and Figma designs into scalable frontend experiences, working closely with product, design, and engineering teams from requirements through delivery.
- Streamline development workflows using Cursor, Claude Code, and Figma MCP for codebase exploration, implementation, debugging, and design-to-code tasks.
- Contribute to end-to-end feature delivery across frontend, APIs, and supporting infrastructure when required to resolve technical issues and ship production functionality.

Atrina Technologies *Mumbai, India*
Next.js Developer *Aug 2024 – May 2025*

- Led a CMS frontend rebuild with Next.js and SSR, improving page-load performance and SEO while establishing a scalable application structure.
- Architected reusable React/Next.js and Tailwind CSS components to improve UI consistency and accelerate responsive feature development.
- Partnered with product, design, and backend teams to turn requirements and UI designs into production-ready features and API integrations.
- Owned technical planning for a 3-month delivery roadmap, defining implementation timelines and aligning frontend execution with product and leadership requirements.
- Authored developer onboarding documentation that reduced ramp-up time by approximately 40%, improving knowledge transfer and team productivity.

Quadb Technologies *Remote, India*
Web Developer *Feb 2021 – Feb 2022*

- Crafted responsive web interfaces from Figma and Adobe XD designs using HTML, CSS, and JavaScript, translating designs into production-ready experiences.
- Engineered Node.js and Express.js APIs with JWT authentication to support secure communication between frontend applications and backend services.
- Implemented maintainable frontend features with a focus on responsive behavior, usability, and reliable product delivery.
- Designed and built KaiOS applications independently for feature phones, adapting interfaces and functionality for performance-constrained devices.
- Resolved frontend and backend issues and delivered production fixes in collaboration with the development team within a fast-moving product environment.

SELECTED PROJECTS

Pragnyapan.ai Website | *Private*
AI-Powered Marketing Platform

- Built an agency SaaS platform that generates evidence-backed marketing audits from a prospect URL, including scoring, ranked actions, and competitor insights.
- Shipped a full audit pipeline (site crawl → AI analysis → review/approve workflow → white-label PDF export) on Next.js, MongoDB, and serverless infrastructure.
- Designed the agency workspace with custom branding, prospect management, maturity scorecard, and client-ready reports for new-business pitches.

MeetSpace Website | Github
Real-Time Video Meeting Platform

- Built a browser-based meeting product where anyone can start a room, share a code or link, and join a live video call — including a pre-join lobby, mute/camera controls, and in-call chat.
- Shipped the full meeting flow (create or join room → name and device check → peer-to-peer call) on Node.js, Socket.IO, WebRTC, and MongoDB.
- Designed the call workspace with a participant video grid, people list, and chat so small teams can meet without a separate conferencing tool.

EDUCATION

Master of Science in Information Technology **Grade: O**
Kishinchand Chellaram College, Mumbai *July 2022 – Apr 2024*

Bachelor of Science in Information Technology **Grade: A+**
Lala Lajpat Rai College, Mumbai *July 2019 – Apr 2022*
